# Geology

Geology, palaeobotany, palaeozoology, and mineralogy on microfiche

## Introduction

IDC presents the revised catalogue covering the fields of geology, palaeobotany, palaeozoology, and mineralogy. This catalogue, which now lists 395 titles, is divided into monographs and serials.

Many of the monographs were published by the Palaeontographical Society in London and the authors include such top specialists as Richard Owen, H. Milne Edwards, E. Forbes and Roy Lankester.

The publications of the United States Geological Survey of 1890-1929 include many monographs written by famous geologists. Both this series and the publications of the Palaeontographical Society can be purchased either individually or as collection.

Among the other important journals in this collection is the American Journal of Science and Arts (1818-1940). This journal founded by Benjamin Silliman is especially strong in the fields of geology and mineralogy.

## Prices

Information about prices, free readers, and order instructions can be found on the IDC price list. If the price list is not enclosed, please ask the IDC office in Leiden, The Netherlands, to send you a copy.

## General information

Scope	339 monographs on 7,025 microfiches 56 serials on 27,519 microfiches
Size of fiches	Designated by the last number of the IDC order numbers: /1 for 105 x 148 mm /2 for 90 x 120 mm
Film type	Positive silver halide
Reduction ratio	Varies according to the size of the original
Internal finding aids	Eye-legible headers with title on each fiche

**ZOOLOGY**

The catalogue lists 211 serials and 1,720 monographs dealing mainly with systematic zoology: early sources which today are either very rare or unobtainable.

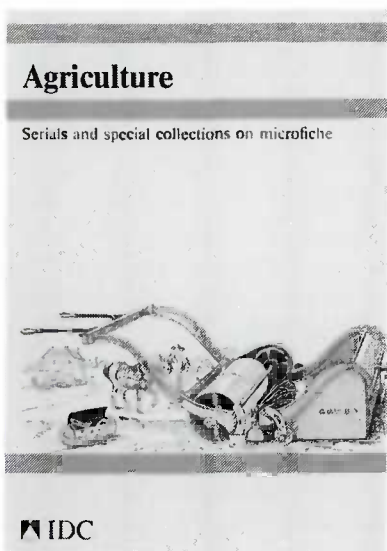

**BOTANY**

**6th cumulative catalogue (1989)**

A new cumulative IDC catalogue on Botany that integrates the 5th cumulative catalogue, its four supplements, and some new titles.

The largest collection of herbaria, serials, and monographs on systematic botany in a microfiche edition.

**AGRICULTURE**

This catalogue lists 69 serials on agriculture and three special collections. The special collections concern *The Bibliography of Agricultural Bibliography 1960-1977* and reports covering agricultural research projects in The Dominican Republic and The Phillipines carried out by the Agricultural University of Wageningen in The Netherlands.
