Guide to the microform collection

IDC number NE-20422

 **IDC** 1996

## **Publisher's note**

For this guide to the Freya Stark photograph collection, IDC has retyped the captions for all of the photographs. Each of the 46 albums which make up the collection bears the name of a country or region. If an album name has a number within brackets, then the number was not part of the original album name.

The photo collection has been organized by filming the albums in alphabetical order and by filming the photographs in the order they appear within each album. With a few exceptions the printed guide follows this sequence.

In this guide, the first line of each entry lists the photo number as mentioned in the albums. The last line lists the microfiche number and gives the photograph's exact location on the microfiche within brackets.

If you would like to obtain more information or if you have any comments, please contact IDC Publishers.
